

The easy way to check the status of your shipments...

With CCN's *Gateway Report* application, you can now check on the current status of your shipments as well as keep track of the FWB & FHL messages sent from your host system all on the one screen.

In real time, *Gateway Report* now displays Freight Status Update (FSU) messages that are sent by airline and CTO systems who provide them. This allows you to see exactly what has occurred when with your shipments.

As this application is a component of the CCNhub web-based portal, it means you can enjoy the benefits of 24/7 access at your convenience.

For more information regarding FSU message types, please visit www.ccnhub.com.au/fsu
